

Chesapeake Cats News

“Working to provide a life of love and dignity for all cats.”

Dear Members and Friends,
December 8, 2006

President's Corner

“I want to thank everyone for their support in our new venture to form an organization to help the animals in need in Queen Anne’s County. I have been amazed by the energy and creativity of our newly formed board of directors who have enabled us to proceed so rapidly and efficiently toward our goals.

Our most urgent need at this time is a small office space to rent, or preferably, given to us as a tax deduction by an individual or company. I ask everyone to work on this for us as we need a place to locate our operation and show our animals for adoption. I would be most grateful for any help with this project. Please feel free to call me at home any time: 410-8273148.”

Thank you, **Sheila Wentzel**

Bay Times Article

What an exciting start to Chesapeake Cats and Dogs, Inc.! **Rose Spik**, reporter for the Bay Times, wrote a stimulating article on our organization in the November 29, 2006 issue of the paper. The article included a picture of the Board of Directors and Officers of the Non-Profit Corporation. Thank you Rose.

Family Assisted With Kitten Care

Our first assist to a family to enable them to keep a kitten is very heartwarming. **Sharon** had bottle fed 2 motherless kittens but was unable at this time to provide veterinary care

for them. Sheila met Sharon at the Cat Hospital in Easton where the 8 week old kittens were

examined and received their first inoculations from **Dr. Renee Rucinsky**. We then took the black female, Lucy, into a foster home. The male, Louie, went home with Sharon and her 2 children

with the assurance that Chesapeake Cats will finance the kitten’s next set of shots and his neutering. The Board members each bought Louie some gifts that were delivered to the home by **Sheila Wentzel** and **Phyllis Lee**. The kitten is obviously much loved and is he ever bouncy! He jumped all over the floor

with his new play mouse. Sharon was very touched by the support we gave her family. She said she would be able to be a foster mother for bottle fed kittens.
